VERNOR ESTATES WATER MAIN PROJECT – LANDSCAPE RESTORATION

April 1, 2026

Dear Bloomfield Township Resident,

The Township is pleased to announce that our general contractor, Bidigare Contractors Inc., has completed the major components of this project ahead of schedule. This work included replacing, and in many cases upsizing, existing water mains with High-Density Polyethylene (HDPE) lines equivalent to 8-inch or larger cast iron pipes. This project also involved replacing and installing fire hydrants and gate-valves, as well as replacing the water service lines and stop boxes within the right-of-way.

Next Steps

Landscape and pavement restoration have resumed in the areas impacted by the water main work that were not completed last fall. This phase will include repairs to existing irrigation systems, placement of topsoil and sod, and pavement repairs at any driveways damaged as a result of the water main work. The restoration work is expected to take approximately six (6) to eight (8) weeks to complete, weather permitting.

Residents who have scheduled maintenance for in-ground irrigation systems may wish to delay service until repairs are completed. The contractor will be responsible for watering the newly placed sod for fourteen (14) days. After that period, responsibility for watering and ongoing lawn maintenance will return to the property owner.

Project Contacts

Should you have any concerns or questions about the project, please notify the Project Engineer, Bloomfield Township Engineering and Environmental Services Department, or Bidigare Contractors, Inc., as listed herein:

Bloomfield Township:
Mark Hendricks
4200 Telegraph Road
Bloomfield Hills, MI 48303
248-200-6814
