UPDATE FOR VERNOR ESTATES WATER MAIN CONSTRUCTION, PHASE 1

October 14, 2025

Dear Bloomfield Township Resident,

Within the next week, the Township expects that our general contractor (GC) for this project, Bidigare Contractors Inc., will complete the major work associated included in Phase 1 (see enclosed map). This includes replacing and, in many cases, up-sizing existing water mains with High-Density Polyethylene (HDPE) lines equivalent to 8-inch or greater cast iron lines as well as replacing and adding hydrants and valves, and replacing the water service lines and valve stop boxes within the right-of-way.

Next Steps

Restoration is now underway for areas disrupted by the work. The GC is responsible for watering any new sod for 14 days. At that time, maintenance of the grass will revert back to the property owner / tenant. Residents that have irrigation systems should test them, if not yet winterized, to verify that any necessary repairs have been completed. Depending on weather conditions over the coming weeks, some restoration may be delayed until after the winter. For these cases, restoration will be performed starting in Spring 2026.

Project Contacts

Should you have any concerns or questions about the project, please notify the Project Engineer, Bloomfield Township Engineering and Environmental Services Department, or Bidigare Contractors, Inc., as listed herein:

Bloomfield Township:
Mark Hendricks
4200 Telegraph Road
Bloomfield Hills, MI 48303
248-200-6814
mhendricks@bloomfieldtp.org

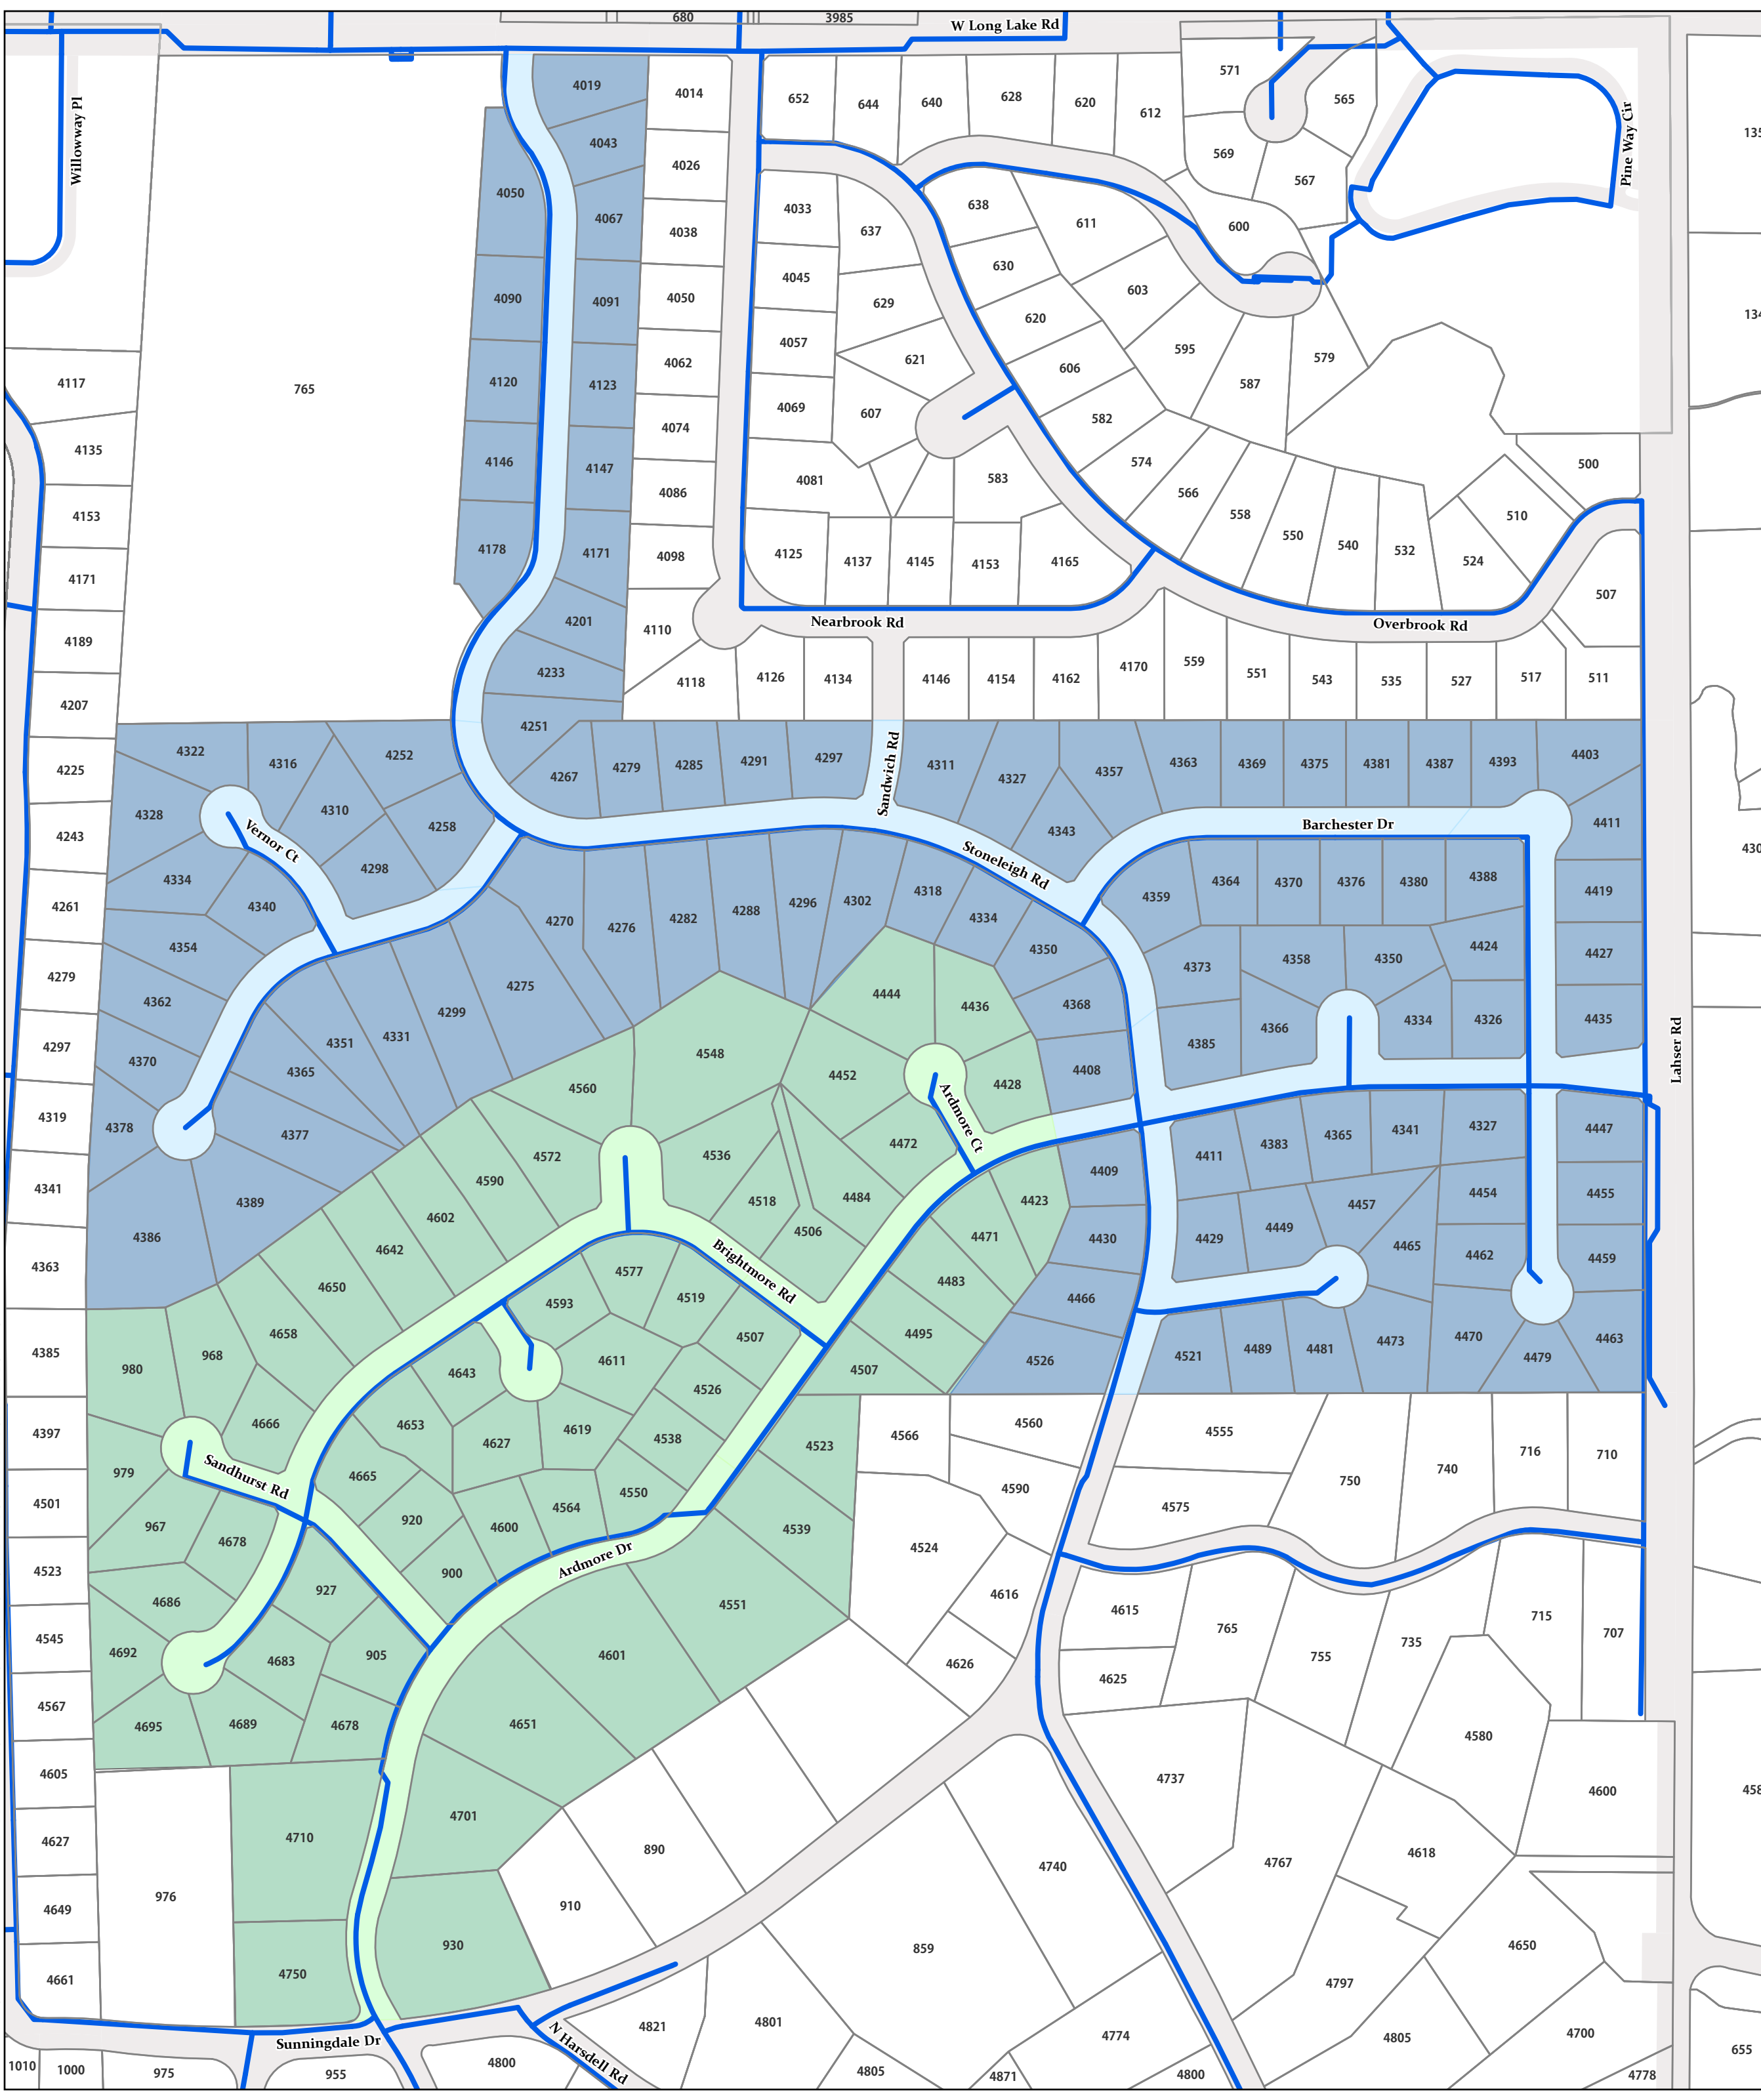

Hubbell, Roth & Clark (HRC):
Chris Ross, P.E.
555 Hulet Drive
Bloomfield Hills, MI 48302
248-330-7344
cross@hrcengr.com

Bidigare Contractors, Inc:
Jordon Bidigare
939 S. Mill St
Plymouth, MI 48170
248-735-1114
jordon@bidigarecontractors.com

In addition to the contact numbers listed above, HRC will also have a field representative, Tom Crouse, available throughout the project who can be contacted at 248-535-4786.

Sincerely,

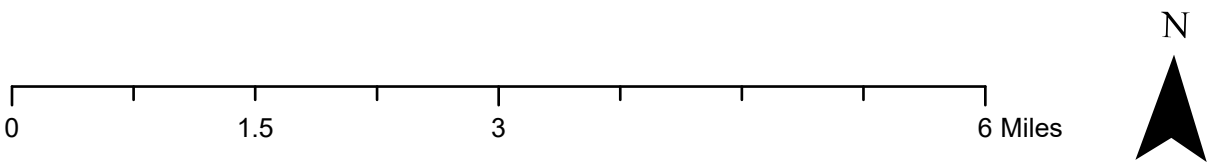

Mr. Gregory Turner, P.E.
Deputy Director - Engineering & Environmental Services
